

CCB Tower

The address is No. 3 Connaught Road Central, Hong Kong, formerly it was the site of Ritz Carlton Hotel Hong Kong. The developer, Lai Sun Development, decided to convert this sought after site location to a harbour view grade-A commercial building with office floor area in about 13,500 sqm. The building development has China Construction Bank as partner who will occupy substantial space of the building as her headquarters in Hong Kong. The building is named CCB Tower.

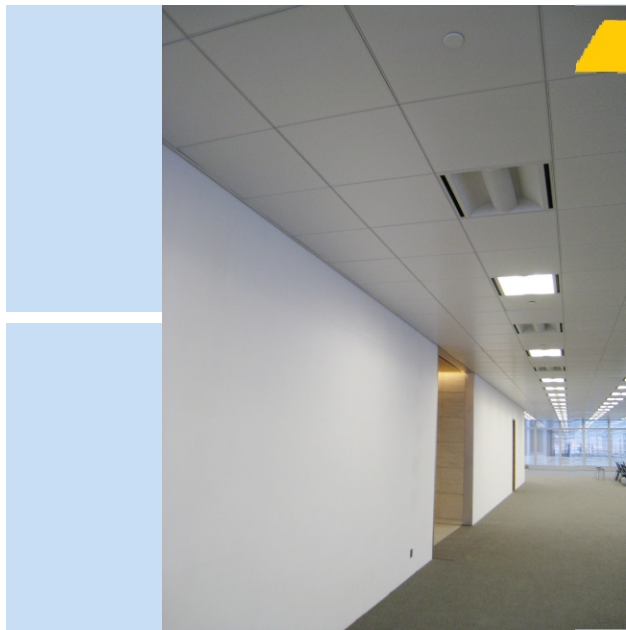

Each office floor of CCB Tower is installed with high end metal ceiling from Suckow & Fischer. The metal ceiling system has flush front aluminium ceiling panels with inserted aluminium profile T-grids in modular of 600 x 600 mm. Ceiling panels have micro-perforation holes in 0.7 mm which provide good appearance & noise reduction properties. There is recessed mitre-joint groove channel in the middle of the 15 mm width ceiling grid that allows fixing wall partition head section underneath.

中國建設銀行大廈

中國建設銀行大廈位於香港中環干諾道中 3 號，此地段前身為香港麗思卡爾頓酒店，發展商麗新發展決定拆卸原酒店改作興建一幢樓面面積達13,500平方米並坐擁維港景色的甲級商業大廈。該大廈為發展商與中國建設銀行的合作項目，中國建設銀行將大廈的大部分樓層用作其香港總部辦公室並命名為中國建設銀行大廈。

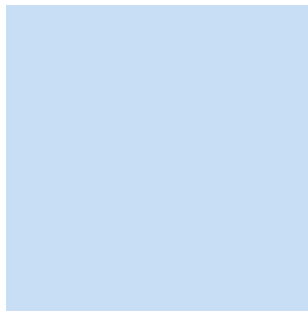

中國建設銀行大廈每層辦公室均安裝斐索高端金屬天花。該天花系統為600x600mm 鋁金屬天花，金屬天花板面及龍骨形成同一水平面，天花表面的0.7mm微沖孔提供良好的吸音效果。15mm的明架天花系統中央預留凹槽，可用作固定隔斷頂部於凹槽位置。

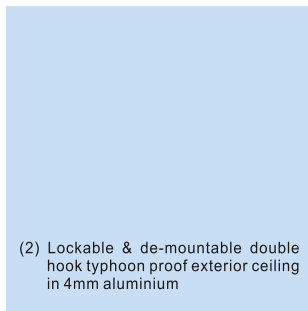

SUCKOW & FISCHER INSPIRATION

(3) Special design aluminium profile for ceiling perimeter & air-diffusers interfacing

(1) High end ceiling finishes - Micro-perforated ceiling panels flushed with fine line ceiling grids with mitre-joint groove recessed channel

Project	: CCB Tower, Hong Kong
Developers	: Lai Sun Development / China Construction Bank
Architect	: Aedas Architects
Main Contractor	: Paul Y. Builders Limited
Ceiling Contractor	: Talford China Limited
Completion	: March 2013
Product Area	: Total about 11,400 sqm of material: 10,500 sqm of interior ceiling; 700 sqm of exterior ceiling & 200 sqm bulkheads.
Product Systems	: Suckow & Fischer System 210 Fine Line Lay-in aluminium ceiling in 600 x 600 mm module with 0.7 mm micro-perforation powder coated in RAL9016; System450Typhoon Proof Double Hook - on aluminium plank; Direct fixed bulkhead aluminium panels.

項目名稱	: 香港中國建設銀行大廈
業主	: 麗新發展 / 中國建設銀行
設計方	: 凱達環球設計師事務所
總承包商	: 保華建造有限公司
天花承包商	: 泰科建材(中國)有限公司
完成期	: 2013年3月
斐索產品面積	: 共約11,400平方米; 10,500平方米室內天花、700平方米室外天花及200平方米封頭板
斐索產品系統	: 斐索210系統幼體明架600x600mm微孔天花; 450系統室外防颱風可拆卸板塊天花及鋁天花牆體收頭

- (1) 高端的天花系統 - 微孔天花配合幼線骨架營造平整有序的效果。
- (2) 4mm厚可鎖定及開合拆卸的室外防風鋁金屬天花。
- (3) 天花板與送風口採用特造鋁合金型材作接合點。
